

## Index to Register of Stillbirths, St. Louis County, Missouri, 1883-1908

The index for this volume was created by Special Collections volunteers Carole Goggin and Anthony F. Kardis, to enable a search for surnames. The entries are listed alphabetically by name of mother. The microfilm for these records is available in Special Collections (STLV-1) and at the Missouri State Archives (C36954). The Special Collections' [microfilm cabinet and shelf location](#) list will tell its specific location.

**Indexed Source:** Missouri. St. Louis County. St. Louis County Clerk. Vital Records. Register of Stillbirths: 1883-1908. Microfilm.

The State of Missouri first passed legislation for county-by-county recording of births and deaths in 1883. Since the recording wasn't mandatory, records are incomplete. Although this legislation was repealed in 1893, St. Louis County continued to record births and deaths until 1910 and stillbirths until 1908, when new legislation made this compulsory. From 1883 until 1908, 200+ stillbirths were recorded for St. Louis County.

This index includes father's name, mother's name, birth date and order of stillbirth within the register. More information can be found on the microfilm, including the following:

- Date recorded
- Sex and race or color of child
- Place of birth
- Name of father and mother
- Nationality of mother and father
- Residence of mother
- Cause of death (if known)
- Signature and address of medical attendant
- Name and address of person making certificate
- Undertaker and place of burial

### Keep in Mind

Some of the information on individual records may not have been recorded. Indexing for births for St. Louis County 1883-1895 is also available on the Special Collections Web site.

[Photocopies](#) of material listed in this index may be requested from Special Collections.
